ABSTRACT

As part of the program evaluation and review process at William Rainey Harper College (WRHC) in Palatine, Illinois, a follow-up study was conducted of students who had successfully completed four or more courses in the college's Food Service Management Program between 1985 and 1990. Questionnaires were mailed to 176 former students. Study findings, based on a 43% response rate, included the following: (1) the average age of the respondents at the time of enrollment was 21.6 years; (2) 54% of food service students were male, 8% were minority, and 23.5% lived out of the school district; (3) respondents typically attended WRHC for 3 years and achieved an average grade point average (GPA) of 2.84; (4) only 57.5% of the respondents graduated from WRHC; (5) 85% of the respondents were employed, and 68% were employed full-time; (6) only 6.7% of the employed respondents who sought food-service employment were in non-food service fields; (7) the most common employment among respondents was in food service and food production, for which students earned an average annual salary of \$24,000; (8) 72% of the respondents reported being satisfied in their jobs, while 12% were dissatisfied; (9) 51% of the employed respondents were working within the district area; (10) respondents rated general education skills acquired at WRHC as more important than technical skills; (11) respondents rated all WRHC courses between very beneficial and beneficial; and (12) 27% of the respondents were currently enrolled in another institution. Tabulated responses and the survey instrument are included. (PAA)

ABSTRACT

THE PURPOSE OF THIS STUDY WAS TO FOLLOW-UP FORMER FOOD SERVICE MANAGEMENT STUDENTS AS A PART OF THE EVALUATION AND PROGRAM REVIEW PROCESS. SURVEYS WERE MAILED TO ALL 176 STUDENTS WHO HAD PASSED 4 OR MORE COURSES IN FOOD SERVICE MANAGEMENT BETWEEN 1985 -1990. AFTER APPROPRIATE FOLLOW-UP, 75 CCMPLETED SURVEYS WERE RECEIVED FOR A 43 PERCENT RESPONSE RATE. THERE WAS AN ABNORMALLY LARGE PORTION OF THE SURVEY POPULATION WHICH COULD NOT BE LOCATED. THESE STUDENTS TENDED TO BE YOUNGER PRE-SERVICE AS OPPOSED TO OLDER STUDENTS ALREADY WORKING IN THE FIELD.

RESULTS OF THE SURVEY SHOWED THAT ALMOST ALL THE FORMER FOOD SERVICE MANAGEMENT STUDENTS WERE ABLE TO FIND EMPLOYMENT OR LIFE SITUATIONS THEY PREFERRED. THEY ARE MOST FREQUENTLY EMPLOYED IN RESTAURANTS OR CORPORATE FOOD SERVICES AS FOOD SERVICE OR FOOD PRODUCTION EMPLOYEES.

THEIR AVERAGE SALARY IS A LITTLE LOWER THAN THE ALL CAREER ALUMNI AVERAGE BUT THAT WOULD BE EXPECTED SINCE THEY ARE YOUNGER THAN MOST CAREER ALUMNI. THEY ARE WELL SATISFIED AND WELL PREPARED FOR THEIR JOBS. INTERESTINGLY, GENERAL EDUCATION SKILLS SEEM MORE IMPORTANT TO THEM THAN MORE TECHNICAL SKILLS. THEY BELONG TO A WIDE VARIETY OF PROFESSIONAL ASSOCIATIONS AND OFFERED A LARGE NUMBER OF SUGGESTIONS FOR IMPROVEMENT OF THE CURRICULUM.

The state of the s

<u>Purpose</u>

The purpose of this study was to follow-up former Food Service Management students as part of the evaluation and program review process. The Coordinator of the Food Service Program requested the study.

Methodology and Population Surveyed

Students who had passed 4 or more Food Service Management courses between 1985 and 1990 were identified as the survey population. A total of 176 students met this criteria. The survey instrument shown in the appendix was developed jointly by the Office of Planning and Research and the Coordinator of the Food Service Program. This survey was mailed to all 176 students in the study population and after two follow-up mailings to non-respondents, 75 completed surveys were received for a 43 percent response rate. At first this seams like a low response rate but 40 percent of the population could not be located as mail was returned non-forwardable and they could not be located in the Chicago area telephone books. Among those who could be located, 71 percent responded which is much more acceptable.

The average age of the respondents was 21.6 with two-thirds being under the age of 21. In terms of intent, 51 percent are seeking a job after finishing at Harper, 21 percent are preparing to transfer and 14 percent are exploring careers. Only 8 percent are seeking to improve job skills. Thus, Food Service Management students compared to other career students tend to be younger pre-service students as opposed to older students already employed in the field. In addition, Food Service Management students tend to be more likely male (54% vs. 45% in general population) less likely minority (8% vs. 12-17% in general population) and more likely live out-of-district (28-1/2% vs. 15% in general population).

Som: 28-1/2% of these students transferred in credits from other colleges when they entered Harper and this is typical of all entering students. Their GPA averages about 2.84 and they typically attend for 3 years and this is comparable to other career students. Only 57-1/2 percent graduate from Harper which seems low for students who have already passed 4 or more Food Service Management courses. This would indicate for many students the skills and specific knowledge are more important for getting the job they want than attaining a degree first.

Discussion of Results

Follow-up results of the survey indicated that 85 percent were employed and 68 percent were employed full time. Only 2.7 percent were unemployed and looking for a job. Moreover, only 6.7 percent were in a non-preferred situation meaning working in a non-related field when they prefer to be in food service, working part-time when they prefer full time or being unemployed when they want a job. Thus, these students being fairly well along in the Food Service Management Program are able pretty much to get the situation they want upon leaving Harper.

These students are hired most frequently by restaurants and corporate or institutional food services. Food suppliers hire a fairly large number. The most frequent type of jobs held are food service and food production. The average salary of these former students is \$24,400 which is a little less than the \$26,400 earned by all career alumni who have been gone from harper for 6 or 7 years. Since Food Service Management students tend to be younger pre-service, the lower salaries would be expected. In terms of how this survey population likes their job, 72 percent report they are satisfied, 16 percent are neutral and 12 percent are dissatisfied. This is close to how all career alumni feel about their jobs. Some 51 percent of those

Discussion of Results (continued)

employed work in-district while 13 percent have moved out-of-state for their job. This latter percent is high but might reflect the young age of the Food Service Management students who are freer to leave the area for jobs.

Considering management skills, 56 percent report they regularly supervise the work of others. When asked how they found their jobs, 70 percent said they found their job either on their own, through friends or by looking at newspaper ads. Only 8 percent worked on the same job as when they first entered Harper. This low percentage reflects the young age of the students in the program.

Twelve skills were rated as to their importance on the student's present jobs. General education skills were rated as more important than more technical skills. Oral communications, motivation of people and problem solving abilities were most important and were rated halfway between very important and important. Realistic exercises simulating industry, culinary skills and legal requirements were least important but were still rated halfway between important and somewhat important. These same skills were rated as to how well students felt they were prepared by Harper in each of these areas. These former students said they were well prepared in all 12 skill areas and there was very little difference between skills.

All the courses in the program were evaluated as to their benefit to the former students. All courses were rated between very beneficial and beneficial. Food Standards and Sanitation was the course rated as most beneficial.

Some 27 percent of the former students were currently enrolled in another college and another 13 percent planned to return to college within the next year. One third of this survey population belonged to 16 different professional associations. In only one third of these cases were the former students also active in their professional associations. A total of 35 students (47%) offered suggestions for improvements in the curriculum.

Major Conclusions

Almost all the former Food Service Management students were able to find employment or life situations they preferred. They are most frequently employed in restaurants or corporate food services as food service or food production employees. Their average salary is a little lower than the all career alumni average but that would be expected since they are younger than most career alumni. They are well satisfied and well prepared for their jobs.

Interestingly, general education skills seem more important to them than more technical skills. They belong to a wide variety of professional associations and offered a large number of suggestions for improvement of the curriculum.

Suggestions for Change in Curriculum in Food Service And Additional Courses Which Would Help in Present Situation

- Introduction to tourism marketing and sales in the hospitality industry industrial psychology environmental science.
- I think definitely more use with computers not only with the different courses, i.e., food cost, purchasing would be 2 that would benefit.
- More courses on motivation and leadership skills more guest speakers who can give feel of school and field experiences.
- I would have liked to have taken the production course years ago but the 6:30 a.m. starting time is not conducive to those of us who have to drive distances or have young children to consider. This course could be offered at a later time. I also feel the lab was not beneficial as to what the course should have been.
- No, but had more courses been offered during the semesters that I needed to take but were not offered until the following semester, I feel I could have finished earlier.
- Would like to see some of the early morning classes in the evening. Difficult to get away from work when classes wanted were only offered during the day.
- Nutrition classes should be a required part of the program, basic computer skills.
- Add more qualified teachers.
- More classes available in early evening.
- Larger selection of night time courses for part-time students.
- An entire course on cake decorating would be very beneficial cake decorators are paid well but experience is almost always required.
- Like the courses offered students need more info on the details involved in registering and graduating.
- When I attended Harper I enjoyed all classes and for my purposes found them great.
- Give waivers on courses which I have accelerated in the field.
- Was thinking about coming back to Harper to study accounting which is important.
- Provide students taking computing classes which many food services operations are now using computer for everything.
- Spend more time on problem with employees high school student how should their schedule be treated.
- Think you should make Spanish and/or French a mandatory requirement. I think a class or seminar in heating and refrigeration would also be beneficial.
- Expand culinary arts program numbers could be increased provided the lab is modified integrate Spanish or another foreign language.
- Sales and/or marketing classes and for those who remain in the food service field, nutrition classes.
- Cake decorating courses

Suggestions for Change in Curriculum in Food Service And Additional Courses Which Would Help in Present Situation (continued)

- Would like to have Harper devote more to the industry as in residence and professional cooking school.

- Involve more business oriented classes/computer classes/maybe some writing class.

- More classes related to foreign language, particularly Spanish - I can talk fairly well, but other managers have a problem at times.

- Open classes up to other junior colleges so low attendance in Fortran classes, i.e., wines and spirits are open to other students.

- Computer class, front office classes, marketing classes, more supervisor classes and more people skills.

- To get more instructors that care about the program like it seems that you do.

- Adding computer courses to the curriculum would help.

- Would like to see more travel and tourism classes. The buzz word now is "Travel Management" I enjoy the Hotel/Tourism part of hospitality. I would like to learn all aspects of the travel/hospitality business, car rental, credit card sales, travel agency, meeting planning, airlines, hotel/lodging, food service, presently, no college or university offers classes in all of these areas. The business travel institute starts the very first school to all area except food and beverage starting in February. The classes will be accredited by the State, 90 hours of classroom studies cost \$2,500 much too much and I cannot use them towards my degree at Roosevelt.
- More selection of evening courses for full-time employees part/time students.
- At the time I was enrolled, course availability was not high enough, probably due to low enrollment of that field.
- Should teach the students more about business law.

- Get more classes at night, summer or weekends.

- A course in planning large groups and how to solicit business contacts.

- Guest lecturers to do not only talking, but involve the class with decision making on any given current situation or problem. Simply stated: Lecturer will give the class a real situation or problem and analyze with them all potential actions or sol, one in depth to determine what should have been done. After debating why all possibilities would have worked or not, lecturer will expose - what they actually did - whether or not they should have done part or all of it differently, and if so, did someone in the class have the aptitude to be on the right track and why they decided to do what they did.

Topics could include: Cost Control (Food and Labor)

Changes in Menu/Theme/Ambiance

Labor needs relating to job descriptions.

Advertising plans

Dealing with competition

Organizing a new store or department - i.e., room service, catering, brunch, carry-out, delivery Buying vs. Leasing - building, trucks, equipment.

My overall opinion of my experiences at Harper's Food Service Management Program is excellent. Although I had been in this field several years prior to attending Harper, classes held my interest and were informative and helpful, even today. Although I learned very much with hands-on experience in the field, Harper broadened my thoughts and helped to build my confidence in my own ideas and thoughts and helped in what I have achieved in my catering business for the past three years. If asked if I would go through the program again had I had a chance to do it all over again --- my answer would be YES! I thank you for your interest and wish you best of luck in producing many years of knowledgeable graduates. Robert Peter, B and T Catering, Scottsdale, Arizona.

APPENDIX

- Survey Instrument
- Cover Letter

December 18, 1991

Dear Former Student:

I hope this letter finds you well, and that you have prospered since leaving Harper both personally and professionally. The Harper College alumni have moved into our industry in many areas. We want to know --

WHAT DO YOU THINK!

The Harper College food service program is changing and analyzing the course work offered. We could use your help in putting together a plan for the program.

We currently are integrating lodging industry information in our courses. harper College has remodeled much of the Palatine campus. Building A is on the list for remodeling and our program has an opportunity to rebuild much of our present facility. Computer applications in the industry seem to be increasing though currently no computer courses are offered through our department. This will not remain without substantial increases in the student enrollments. Secretarial services are provided through the Division Office. Your recommendations concerning these changes would be greatly appreciated.

Our staff has changed with the addition of myself. I hail from Detroit, Michigan where I graduated from a community college, Grand Valley State University, and Central Michigan University. I come with 18 years of Food and Beverage Operations experience and look forward to a long tenure at Harper College.

Any information you supply will be kept strictly confidential and will only be used in combination with answers from other students. The number on the survey enables us to remove your name from the mailing list when your completed response is received. This saves the College the cost of a second follow-up mailing in addition to a follow-up telephone call to non-respondents. For your convenience in returning the questionnaire we have enclosed a self-addressed envelope.

Please feel free to express your concerns and coupliments. Harper thanks you in advance!

Sincerely,

Patrick J. Beach Hospitality Coordinator

jc Enclosures

FOLLOW-UP OF FORMER FOOD SERVICE MANAGEMENT STUDENTS

	What is your present status? Check (x) one. A. Employed full time but not enrolled in college. B. Employed full time and enrolled in college part time. C.
